

Hannah Whelan

Machine Learning Engineer · 6 years of experience

hannah.whelan@example.com · +44 20 7946 0192 · London, United Kingdom

PROFILE

Machine Learning Engineer with 6 years of experience building and deploying production AI systems in high-throughput fintech and automation environments. Specialized in natural language processing, computer vision, and scalable cloud deployment pipelines. Track record of optimizing model latency and reducing false-positive rates across critical operational workloads.

EXPERIENCE

Machine Learning Engineer

2022-03 — Present

Revolut

Architected real-time fraud monitoring systems using PyTorch and GCP Vertex AI, servicing 14 million daily transactions. Reduced false positive alerts by 19% and maintained inference latency under 40 milliseconds. Standardized containerized model deployments using Docker across a cross-functional team of 8 engineers.

Machine Learning Engineer

2020-04 — 2022-02

Monzo

Engineered automated customer support classification models applying NLP techniques and TensorFlow to route 600,000 monthly user inquiries. Achieved a 22% increase in immediate resolution rate and decreased average customer response time by 3 minutes. Built automated retraining and evaluation pipelines using MLflow on cloud infrastructure.

Junior Machine Learning Engineer

2018-05 — 2020-03

Ocado Technology

Developed Computer Vision pipelines in Python for quality verification in automated fulfillment facilities. Improved item damage detection accuracy from 91% to 97% while processing 30 image frames per second on edge computing nodes. Containerized deployment scripts using Docker to simplify fleet-wide deployment.

SKILLS

Python

PyTorch

Machine Learning

Docker

NLP

TensorFlow

Computer Vision

GCP

SQL

Kubernetes

MLflow

EDUCATION

MSc Software Engineering · 2018

Trinity College Dublin

BSc Computer Science · 2017

Trinity College Dublin
