Tomás Yilmaz

DevOps Engineer · 5 years of experience

Mid-level DevOps Engineer with 5 years of experience streamlining cloud infrastructure and building resilient automation pipelines. Specialized in Kubernetes orchestration, Infrastructure as Code with Terraform, and GCP management for high-scale environments. Proven record of improving system uptime to 99.99% and reducing cloud operational costs.

EXPERIENCE

DevOps Engineer

2022-06 — Present

Feedzai

Architected automated CI/CD pipelines in GitLab for cloud-native fraud prevention services, accelerating deployment frequency by 300%. Managed enterprise Kubernetes clusters in GCP handling over 8,000 transactions per second with 99.99% uptime. Optimized infrastructure provisioning using Terraform modules, cutting cloud resource expenses by 22%.

DevOps Engineer

2020-09 — 2022-05

Satispay

Maintained secure Linux container infrastructure supporting high-volume mobile payment processing for 2 million active users. Streamlined microservice containerization using Docker and Helm, reducing build failures across 8 engineering teams by 40%. Implemented Prometheus and Grafana monitoring stacks to improve mean time to detection (MTTD) by 35 minutes.

Junior DevOps Engineer

2019-03 — 2020-08

Getir

Configured baseline GCP virtual machines and networking configurations using Terraform scripts for rapid regional expansions. Supported continuous integration flows for logistics services, decreasing deployment rollback rates from 12% to 2%. Managed automated Bash and Python scripts for server upkeep and centralized Linux log aggregation.
