

Sanne de Vries

Product Manager · 4 years of experience

sanne.devries@outlook.com · +31 20 794 8210 · Amsterdam, Netherlands

PROFILE

Data-driven Product Manager with 4 years of experience delivering scalable payment and e-commerce solutions across high-growth platforms. Skilled at bridging technical engineering capabilities with customer needs through quantitative analysis, user research, and continuous experimentation. Proven track record of optimizing conversion funnels, lowering system latency, and driving merchant growth.

EXPERIENCE

Product Manager

2022-09 — Present

Adyen

Led cross-functional product initiatives for global payment checkout APIs, reducing integration latency by 35% for over 1,200 enterprise merchants. Utilized Figma and User Research sessions to redesign onboarding flows, increasing merchant self-service setup completion by 22%. Managed sprint planning and backlog refinement in Jira for a team of 8 software engineers and data analysts.

Associate Product Manager

2021-03 — 2022-08

Booking.com

Optimized localized search and checkout funnels across European markets serving 15 million monthly active users. Designed automated analytical workflows in Python and SQL to identify churn drivers, presenting insights via Tableau and Power BI dashboards. Spearheaded 18 A/B experiments that boosted booking conversion by 1.8% and generated an estimated €3.2M in incremental revenue.

Junior Product Manager

2020-03 — 2021-02

Mollie

Owned the roadmap for SEPA automated recurring payments, decreasing transaction failure rates from 4.1% to 1.5%. Synthesized qualitative insights from User Research and quantitative telemetry in SQL to streamline the merchant dashboard UI. Collaborated with engineering leads to document API specifications and maintain task workflows inside Jira.

EDUCATION

MSc Electrical Engineering · 2020

University of Amsterdam

BSc Electrical Engineering · 2018

University of Amsterdam
