

Owen Byrne

Senior QA Automation Engineer · 8 years of experience

owen.byrne@example.co.uk · +44 131 496 0182 · Edinburgh, United Kingdom

PROFILE

Senior QA Automation Engineer with 8 years of experience building scalable test frameworks across fintech and on-demand delivery platforms. Specializes in end-to-end web testing, API automation, and integrating continuous testing into CI/CD pipelines. Reduced regression testing execution time by 65% while leading quality strategy across multi-functional engineering teams.

EXPERIENCE

Senior QA Automation Engineer

2022-12 — Present

Wise

Architected a TypeScript and Cypress test automation framework covering core cross-border payment flows, reducing nightly regression runtimes from 4 hours to 45 minutes. Integrated automated test suites directly into GitHub Actions CI/CD pipelines, increasing release deployment frequency from bi-weekly to daily. Led quality initiative across 3 pod teams comprising 18 engineers to enforce test coverage standards exceeding 85%.

Senior QA Automation Engineer

2020-09 — 2022-11

Revolut

Developed a Java and Selenium test infrastructure for retail banking web portals, expanding parallel execution capabilities to handle 200 concurrent browser instances. Decreased production critical bug reports by 40% through targeted API test automation using REST Assured. Managed test execution reporting and issue tracking using Jira dashboards to maintain visibility across 2 core product lines.

QA Automation Engineer

2018-06 — 2020-08

Monzo

Built end-to-end integration test suites for backend microservices using Java and Git, covering over 120 API endpoints. Collaborated with 8 developers to build automated smoke tests into deployment pipelines, reducing production hotfix frequency by 30%. Streamlined test data generation, cutting test setup latency by 50% across staging environments.

QA Engineer

2016-07 — 2018-05

Deliveroo

Created automated UI test scripts using Selenium and TypeScript for consumer ordering web platforms. Executed performance and regression testing across 4 regional markets, identifying critical checkout bottlenecks prior to feature launches. Maintained defect backlogs in Jira and reduced overall test suite failure flakiness from 12% to under 2%.

EDUCATION

BSc Data Science · 2016

Imperial College London

SKILLS

Frameworks	Selenium · Cypress · Playwright · REST Assured
Tools	CI/CD · Git · Jira
Languages	Java · TypeScript
Cloud	Docker

LANGUAGES
