

Priya Byrne

Machine Learning Engineer · 4 years of experience

priya.byrne@outlook.com · +44 7700 900077 · London, United Kingdom

PROFILE

Machine Learning Engineer with 4 years of experience designing, training, and deploying scalable computer vision models. Expert in building low-latency inference pipelines and containerized deep learning systems for automated visual recognition. Proven capability in translating complex neural network architectures into reliable production services.

EXPERIENCE

Machine Learning Engineer

2022-09 — Present

Ocado Technology

Developed PyTorch-based Computer Vision systems for robotic pick-and-place operations, improving item grasp success rates by 18%. Containerized deep learning inference pipelines with Docker, reducing latency from 120ms to 35ms per frame. Automated data annotation workflows using active learning, reducing manual labeling costs by 30% for a team of 15 annotators.

Machine Learning Engineer

2020-09 — 2022-09

Wise

Built Machine Learning models in Python and TensorFlow to automate international document verification processes. Engineered real-time OCR and layout analysis systems, scaling throughput to handle 200,000 documents daily with a 94% extraction accuracy. Designed validation pipelines that reduced verification times by 40% while maintaining compliance standards.

EDUCATION

MSc Interaction Design · 2020

Trinity College Dublin

BSc Computer Science · 2019

Trinity College Dublin

SKILLS

Languages	Python · SQL
Frameworks	PyTorch · TensorFlow · OpenCV
Data	Machine Learning · Computer Vision
Tools	Docker
Cloud	AWS

LANGUAGES

English · Native
