

Beatriz Barbosa

Senior Product Manager · 7 years of experience

beatriz.barbosa@gmail.com · +55 11 98122-3456 · São Paulo, Brazil

PROFILE

Data-driven Senior Product Manager with 7 years of experience scaling fintech and e-commerce platforms in Latin America. Proven track record of leveraging user research and analytics to optimize transaction conversion rates and drive digital wallet adoption. Adept at leading cross-functional squads to deliver high-impact features aligned with core business metrics.

EXPERIENCE

Senior Product Manager

2022-10 — Present

Nubank

Led the core credit card acquisition team, managing a cross-functional squad of 12 engineers, designers, and data analysts. Redesigned the onboarding funnel using Figma for user flows and tracked performance via SQL, boosting user conversion rates by 14% and reducing drop-offs. Collaborated with risk teams to integrate dynamic credit scoring models, acquiring over 1.2M active cardholders in 18 months.

Product Manager

2020-11 — 2022-09

Ualá

Managed the personal loans product line, conducting qualitative User Research and implementing iterative A/B testing. Created operational dashboards in Tableau and Power BI to monitor portfolio health and repayment rates. Improved digital loan checkout completion by 18% and integrated credit bureau APIs to lower approval decision times to under 30 seconds.

Product Manager

2019-03 — 2020-10

Rappi

Owned checkout and native payment experiences for RappiPay in Brazil, managing backlog prioritization and sprint planning in Jira. Introduced localized payment methods that increased successful transactions by 6.2%. Reduced average transaction latency by 300ms through database query optimizations and API redesigns.

Associate Product Manager

2017-08 — 2019-02

Mercado Libre

Collaborated on checkout flow optimization for Mercado Pago, writing SQL queries to discover friction points in the conversion funnel. Implemented targeted user surveys that informed micro-interaction updates, reducing mobile cart abandonment by 5%. Managed cross-functional delivery milestones for 2 agile software development teams.
