

Tomás Ricci

DevOps Engineer · 3 years of experience

tomas.ricci@gmail.com · +351912345678 · Lisbon, Portugal

PROFILE

DevOps Engineer with 3 years of experience optimizing cloud infrastructure and automation pipelines. Specialized in container orchestration and infrastructure as code to drive system reliability and deployment velocity. Pragmatic problem solver with a solid data science background and strong Python scripting capabilities.

EXPERIENCE

DevOps Engineer

2023-01 — Present

Unbabel

Engineered and maintained Azure-based Kubernetes (AKS) clusters supporting localization APIs, reducing infrastructure drift by 40% through declarative Terraform configurations. Implemented Prometheus and Grafana monitoring setups that decreased mean time to detect (MTTD) system anomalies from 25 minutes to under 3 minutes. Automated software delivery by building custom Python helper utilities within GitLab CI/CD pipelines.

DevOps Engineer

2022-03 — 2022-12

Getir

Optimized multi-tenant Docker container configurations on Linux hosts, improving microservice startup latency by 15%. Automated infrastructure provisioning with Terraform, reducing the onboarding setup time for new engineering environments from 3 days to under 45 minutes. Partnered with product teams to scale delivery systems, ensuring 99.9% uptime across production clusters.

Junior DevOps Engineer

2021-03 — 2022-02

Satispay

Developed Python automation scripts to replace manual log-rotation and daily backup jobs on Linux servers, saving 5 engineering hours per week. Assisted in migrating legacy payment-processing workloads into Docker containers. Configured basic Prometheus alerts and Grafana dashboards to track system resource utilization.

EDUCATION

MSc Data Science · 2021

Boğaziçi University

SKILLS

Tools	Kubernetes · Terraform · Docker · Linux · Prometheus · Helm · GitLab CI/CD · Git
Cloud	Azure
Languages	Python · Bash

LANGUAGES

Italian · Native English · Fluent
