

Aino Åberg

Senior Data Scientist · 6 years of experience

aino.berg@outlook.com · +358 40 123 4567 · Helsinki, Finland

PROFILE

Senior Data Scientist with 6 years of experience designing and deploying machine learning pipelines, predictive models, and real-time data analytics systems. Specialized in optimizing user behavior analysis, conversion metrics, and algorithmic decision-making across logistics, gaming, and fintech sectors. Proven track record of translating high-volume behavioral data into scalable, production-grade solutions.

EXPERIENCE

Senior Data Scientist

2022-03 — Present

Wolt

Owned the development of merchant recommendation algorithms using Python and scikit-learn, improving order conversion rates by 4.2% across European markets. Scaled automated data pipelines on Snowflake to process 50M+ daily telemetry events with sub-second retrieval latency. Collaborated with a cross-functional product team of 12 to deploy deep learning models for courier delivery time estimation, reducing average deviation by 18 seconds.

Data Scientist

2020-01 — 2022-02

Supercell

Designed predictive lifetime value (LTV) and churn models using machine learning techniques, decreasing prediction error variance by 22% for active global titles. Maintained and scaled interactive Tableau dashboards monitoring cohort behavior and monetization for over 5M daily active users. Developed automated A/B testing evaluation systems that streamlined experiment configuration and reduced analysis cycle time from 3 days to 4 hours.

Data Scientist

2018-01 — 2019-12

Klarna

Developed fraud detection and risk assessment classifiers utilizing Python and complex SQL query structures. Reduced credit decision false positives by 9% while maintaining a 99.8% system uptime during peak commercial shopping events. Engineered clean data schemas and managed custom feature store pipelines to accelerate model training cycles.

EDUCATION

BSc Interaction Design · 2017

KTH Royal Institute of Technology

SKILLS

Languages	Python · SQL
Frameworks	scikit-learn · PyTorch
Methodologies	Machine Learning · Deep Learning
Data	Snowflake · Apache Spark
Tools	Tableau · Docker

LANGUAGES

Swedish · Native English · Fluent French · B1
