Jonas Brandt

Senior Frontend Engineer · 10 years of experience

Performance-driven Senior Frontend Engineer with 10 years of experience building high-scale web applications in fast-growth e-commerce and fintech domains. Proven track record of optimizing page load times, scaling web architecture using modern React frameworks, and mentoring cross-functional engineering teams.

EXPERIENCE

Senior Frontend Engineer

2022-03 — Present

Delivery Hero

Led a team of 4 frontend developers to rebuild the global checkout funnel using Next.js and TypeScript, reducing PageSpeed Index by 35% and increasing order conversion rates by 2.4%. Migrated legacy REST APIs to a unified GraphQL gateway, lowering network overhead for mobile clients by 40%.

Senior Frontend Engineer

2019-09 — 2022-02

N26

Maintained and optimized critical web app features using React, TypeScript, and Git. Elevated Lighthouse accessibility and performance scores from 72 to 95, and successfully trimmed bundle sizes by 120KB through targeted Webpack code-splitting.

Frontend Engineer

2017-01 — 2019-08

HelloFresh

Developed interactive recipe selection interfaces using React and JavaScript. Collaborated with design teams to integrate a unified component library, accelerating feature shipping times by 20% across 3 distinct cross-functional product teams.

Frontend Engineer

2014-06 — 2016-12

SoundCloud

Constructed responsive web features for core audio playback components using JavaScript. Ran comprehensive A/B testing on user playlists, successfully lifting overall listener engagement metrics by 8% over a six-month duration.
