Bram Visser

Frontend Engineer · 6 years of experience

Frontend Engineer with 6 years of experience building scalable web applications and resilient design systems in fintech and e-commerce. Specializes in TypeScript, React, and GraphQL to optimize client-side performance and streamline checkout workflows. Proven track record of improving page load metrics and boosting checkout conversion rates across high-throughput platforms.

EXPERIENCE

Frontend Engineer

2022-09 — Present

Mollie

Architected modern merchant dashboard components using React, TypeScript, and GraphQL, serving over 130,000 active European businesses. Standardized component library usage across 4 product teams, reducing frontend bundle size by 24% and decreasing LCP from 2.8s to 1.4s. Implemented comprehensive end-to-end testing suites with Playwright, raising web test coverage to 88% and cutting release regression incidents by 35%.

Frontend Engineer

2020-04 — 2022-08

Adyen

Developed core web checkout flows and payment drop-in components using JavaScript, React, and TypeScript. Optimized client-side render times by 40% across high-volume checkout funnels handling over 1,500 transactions per minute. Collaborated with UX designers to scale internal Design Systems, resulting in a 15% improvement in mobile checkout conversion rate.

Frontend Engineer

2018-05 — 2020-03

Picnic

Built key web platform interfaces for order tracking and customer support management utilizing JavaScript and React. Integrated GraphQL endpoints to streamline data fetching, reducing network payload sizes by 30%. Established Git workflow standards and automated web build pipelines, trimming deployment cycles from 45 minutes to 12 minutes.
